

Cassina

Cassina relaunches the *Mex* project and takes it a step up with particular attention to the environment

Mex takes a step up towards comfort and versatility

Following the great success of *Mex Cube* designed by Piero Lissoni in 2007, the collection expands to host the **same model in a high version**. *Mex-Hi* is a versatile modular system that adapts to different spaces thanks to the variety of elements and configurations available. **Its large volumes are defined by soft, extremely comfortable padding**, like the *Mex Cube*, all raised from the ground thanks to a simple yet sophisticated metal structure.

Infinite combinations

Dynamic and creative, *Mex-Hi* is **open to multiple interpretations and uses**. The project consists of five different sized bases on which independent cushions are fixed - armrests, backrests and seats - to allow the creation of corner, inline or island compositions.

A project by Cassina LAB

Thanks to the study carried out by Cassina LAB, a collaboration between the Cassina Research and Development Centre and Poli.design at the Milan Polytechnic, a 100% recycled fibre, made from PET mainly recovered from the sea, has been incorporated in the cushion padding of *Mex-Hi* **in respect of the environment, making it even more comfortable**.

This research is part of a more in-depth project that expresses the company's desire to identify alternative materials to be adopted in the development of its products as well as to promote the general well-being of its users.

A complete offer

A large pouf/ table with the same structure as the sofa completes the proposal. It has a thin seat cushion that can be combined with a marble surface or wooden trays to make it an even more practical accessory. A freestanding coffee table is also available with the same finishes for both the structure and the top.

The result is a harmonious picture of variations on the same theme, where each form is studied in detail to trace the individual gestures of everyday life and reproduce forms of sociability and the rhythm of conversation.

Cassina

Materials:

base in D20mm tubular steel painted matt anthracite or polished chrome;
seat, back and arm cushions with a tubular steel frame with elastic belts and polyurethane foam padding with polyurethane inserts of different densities covered in 100% recycled fibre coupled with velvet;
removable upholstery in leather or fabric from the Cassina Collections;

pouf and coffee table-top in a wide selection of marbles (white Carrara, black Marquina, grey Carnico, Sahara Noir, Emperador and Calacatta) with a matt or glossy polyester finish, or trays in natural solid Canaletto wood, natural oak or stained black oak with a low gloss finish.

Measurements:

base	310x90xh.70/40cm
	270x90xh.70/40cm
	250x90xh.70/40cm
	220x90xh.70/40cm
	180x90xh.70/40cm
	130x110xh.70/40cm
pouf/ table	130x110xh.26m
tables	40x90xh.h.36cm.
